Goal

The goal of UBE is the key government policy in education. Given its significance, it has been included in significant Government of PNG's policy frameworks such as the Medium-Term Development Strategy, the UBE Plan 2010-2019, the Strategic Plan 2010-2030, and Vision 2050. The trend analysis of UBE performance of provinces and districts will highlight their performance since 2007 and provide evidence to inform interventions for making further progress towards the goal of UBE.
